Profile

I'm a frontend developer with 1.5 years of hands-on experience in web development. My passion for programming fuels my drive to create engaging and user-friendly websites. I take pride in my ability to turn complex design concepts into interactive, responsive web applications. My adaptability and problem-solving skills, combined with my dedication to staying up-to-date with the latest web technologies, make me an asset to any team.

Professional Experience

Frontend Developer

Jun 2022 – present | Cairo, Egypt

Dirac Systems (Subsidiary of Fawry) 🔗

- Led the development of a new ERP System, commencing with the HR Module, and working now in the Accounting Module using React, Redux, and Material UI.
- Contributed to the creation of websites, mobile applications, and landing pages, guiding projects from initial concept to successful deployment
- Enhanced ERP System functionality by developing new features and resolving multiple bugs across various modules. Tasks included grid resizing, arrow button navigation in Kendo's table library, introducing a new theme, and optimizing date navigation in the timeline. addressed security concerns like SQL Injection.
- Collaborated closely with implementation team members to deliver innovative feature developments that enhanced product functionality
- Played a pivotal role in the implementation and maintenance of a POS system
- Championed a mobile-first strategy, standardizing all project output to be responsive and user-friendly.
