

Mostafa Habib

Frontend Software Engineer

OBJECTIVE

- I am a frontend software engineer passionate about computer science, especially web development who loves Translating designs into high-quality code, Proficient with Javascript and its new specifications, React.js and its ecosystem, HTML, and CSS. proactive in suggesting ideas, Good problem-solving skills solved problems on codeforces.

EDUCATION

React nanodegree scholarship	Udacity and FWD	3/2022 - 4/2022
3-Month Diploma	Information Technology Institute	6/2019 - 9/2019
Completed ITI Diploma at Web & User Interface Development Track.		

Computer Science	Minufiya University	9/2016 – 5/2020
<ul style="list-style-type: none">B.S.E. in Computer Science Engineering, July 2020.Undergraduate Coursework: Operating Systems; Databases; Algorithms; Programming Languages; Software Engineering; KBS; System Analysis; Data Structures;		

TECHNICAL EXPERIENCE

Projects

- E-Commerce Amazon Clone:** it's a web application to display and market products for online shopping, using (Sass in template design, React.js for frontend functionalities, Nodejs, expressjs for APIS, and firebase for database). **live:** <https://lnkd.in/gkK64Kud> **repo:** <https://lnkd.in/gCMeUz3h>
- Realtime Chat:** Realtime Chat that makes you sign-up or log in and chat with anyone who has the application and you can search for anyone, using (HTML5 in CSS3 template design, Javascript for frontend functionalities, php for APIS, and Mysql for database). **live:** <https://lnkd.in/gETbEEUK> **repo:** <https://lnkd.in/gePCgHWe>
- Products Management System:** is a web app for products management system that makes you add a new item for any number of products and calculate the total price of the product after that you can delete or update or even delete all products, using (html5 ,CSS3 in template design, Javascript for frontend functionalities and local storage for store data). **live:** <https://bit.ly/3IEx1fe> **repo:** <https://bit.ly/3sFJDgQ>
- Weather App:** it's a simple web that allows you to know the weather depending on your location , using (SASS, HTML5,Javascript and AJAX for external api). **live:** <https://bit.ly/33bTS2g> **repo:** <https://bit.ly/3GEb0v9>
- Firegarm:** it's like Instagram allows you to upload images on the app to be watched, using (Html5, CSS3, React Js Framer Motion, Firebase). **live:** <https://bit.ly/3sfOHbh> **repo:** <https://bit.ly/3JPKrFp>
- MyReads book:** Udacity Project where you can select any book and put it on the shelf you want, shelves like “want to read” or “reading ”, using (Html5, CSS3, Reactjs and AJAX for external API). **repo:** <https://bit.ly/3JxPmdw>

Experience

Web Developer Intern	Sparks Foundation	1/2022 - 3/2022
Banking system		
<ul style="list-style-type: none">Implementing responsive design to the bank system - Writing Scripts in PHP and Js to Create APICreating a database with MySQL.		

ADDITIONAL EXPERIENCE

Activities

- Joined Enactus at Minufiya as a project management member.
- Joined MUFIX at Minufiya University as a HR member.

Courses

- Internship about Entrepreneurship with InnovoEgypt.
- Front End Web Development Nanodegree from NTL.

Languages and Technologies

- Programming Languages:** Javascript - Python - Java - C++ [Problem Solving - Data Structure - Algorithm].
- Frontend development:** Reactjs - Vuejs - Nextjs -Typescript - Html5 - CSS3 - SASS/SCSS - Bootstrap - tailwind MaterialUI - Redux - React Router - React Bootstrap - Styled Components - Axios - Jest - AJAX - Restful APIs.
- Backend development:** Nodejs - Expressjs - SQL Database - Firebase.
- Other:** Adobe XD - Photoshop - Visual Studio - Git/Github - Unit test - Linux- Agile methodology.
